

Appendix: Company scorecards

Saputo Dairy*

18th OUT OF 21 MANUFACTURERS

36 OVERALL SCORE (OUT OF 100)

Areas of strength

- Saputo publishes a commitment to improving population nutrition and health, outlined in publicly accessible company sustainability reports.
- Saputo has commitments around improving the healthiness of their products, including a global target for 84% of products to meet their adopted nutrient criteria by 2024, and annual reports their performance.
- Beyond the industry's self-regulatory commitments around marketing of unhealthy foods to children, Saputo does not advertise butter, cream and ice cream products to children (aged under 15 years), regardless of the product's nutritional content.

Recommended actions for Saputo

- Set** a target to increase the proportion of sales from healthy products (as defined with government-endorsed classifications of product healthiness), and publicly report progress against this target each year.
- Develop** specific, timebound targets to reduce sodium, saturated fat, sugar and energy levels across the portfolio, in line with government reformulation targets. **Report** average nutrient levels by category.
- Publish** a commitment to fully implement Health Star Rating labelling across eligible products in all categories, with a specific roll-out plan and routine reporting of progress.
- Strengthen** current policies to effectively reduce the exposure of children (**up to age 18**) to the marketing of unhealthy products and brands, across all channels and settings. For example, by **auditing** compliance to marketing policies and routinely **disclosing** their performance in the Australian context.
- Develop** a policy to ensure product distribution into schools allows only healthy products (e.g., milk beverages with no added sugar, in appropriate portion sizes).
- Work** with supermarket retailers to incentivise consumer purchases of healthy/healthier products (e.g., through shelf space, strategic placement and product promotions), whilst reducing promotions (e.g. price discounts, promotional displays) for unhealthy products
